

## LEED Compliance Statement

February 20, 2020

All of our semi-rigid polyurea joint fillers are 100% solids and exceed the VOC safety guidelines established by the U.S. EPA. They are specifically known as the following:

**Hi-Tech PE-65**

**Hi-Tech PE-75**

**Hi-Tech PE-85 M.I. (CDPH 1.2/LEED V4)**

These polyurea joint fillers meet the USGBC's LEED® requirement of Indoor Environmental Quality (IEQ) Credit 4.1: Low-Emitting Materials – Adhesives and Sealants for 1 Point. These products also comply with the South Coast Air Quality Management District (SCAQMD) Rule 1168, for Non-Porous Sealants, which is a requirement of IEQ4.1. In addition, job sites within 500 miles of our Ontario location are eligible for 1 - 2 points per the USGBC's LEED® requirement of Material and Resources (MR) Credit 5: Regional Materials.

In addition to our joint fillers meeting these requirements, all of our rapid curing concrete repair products do as well. They are specifically known as the following:

**Hi-Tech Spall FX & FX2**

**Hi-Tech Spall RX & RX2**

**Hi-Tech Spall TX & TX2**

**Hi-Tech Spall TX3 (CDPH 1.2/LEED V4)**

**Hi-Tech Spall LPX**

Please refer to our Technical Data Sheets (TDS) for the VOC contents on these products which you will find on our website, [www.hitechpolyurea.com](http://www.hitechpolyurea.com).

Thank you and please contact us should you have any questions or require assistance.
